

What is Claimed Is:

1. A digital electronic circuit, comprising:  
first and second nodes; and  
a digital control structure responsive to a signal received at either of  
said nodes for connecting said first node to said second node.
  
2. A method of controlling connectivity between first and second nodes of  
a digital electronic circuit, comprising the steps of:  
10 maintaining the first and second nodes disconnected from one another;  
and  
connecting the first and second nodes to one another in response to  
receipt of a control signal at either node.
